and the space behind the rendering.

PROJECT READING

Eltiera Views

Lake-facing apartments and a four-level clubhouse in Jumeirah Islands: a different way to live in a neighbourhood associated with villas.

A proposed balcony outlook at Eltiera Views — developer visualisation, not a view from every home.

Location · Jumeirah Islands, Dubai

Developer · Ellington Properties

Homes · One- to four-bedroom apartments

Eltiera Views brings apartments to the lake setting of Jumeirah Islands. The proposition combines a private home with substantial shared facilities, centred on a four-level clubhouse. It is an alternative to the district's villa living, not a smaller version of it: outside space, privacy and the way residents use the grounds work differently in an apartment development.

Choose the plan and orientation together

The published range runs from one to four bedrooms. Within that range, the living-room shape, bedroom separation and connection to the balcony can matter as much as total area. A separate room for work may be more useful than extra space in a corridor; a family may prefer bedrooms set away from the main entertaining area.

Underlying project references: 19 September 2026. PDF prepared 5 October 2026.

THE HOME AND THE INVESTMENT

Which kind of home fits your routine?

The choice	What it offers	What changes the decision
Eltiera Views apartment	A private apartment with lake-side surroundings and shared facilities	Compare the individual plan, orientation and route to the clubhouse.
Nearby villa	A separate home with its own outdoor arrangement	Read garden space, privacy and upkeep alongside the rooms you need.
Coastal apartment	A different relationship to the shoreline and surrounding district	Compare actual beach access and everyday destinations, not the waterfront label alone.

Project references checked 19 September 2026.

What changes the investment case

Eltiera Views suits a household that wants the Jumeirah Islands lake setting with apartment living and a substantial clubhouse. A villa gives a different relationship to private outdoor space and upkeep. The selected layout, orientation and recurring ownership costs determine which arrangement makes sense for the household.
